

BRAND GUIDELINES

Brand Guide.

Color, typography, marks, and the signature devices that make a document instantly recognizable as Stratos Edge.

Color.

The whole brand sits on a small palette. Use only these.

CORE

INK
#04242D

CORAL
#FF6B4A

WHITE
#FFFFFF

OFFWHITE
#F8F8F8

CREAM
#F2F0E9

CORAL GRADIENT
#FF6B4A → #FF8A6B

SECONDARY & UTILITY

ROLE	VALUE	USE
Muted text	rgba(4, 36, 45, 0.55)	Captions, sub-copy on light. Opacity-derived from INK, not a separate grey.
Hairline	rgba(4, 36, 45, 0.08)	Card borders, section dividers, accordion separators.
Coral tint	#FFF8F5	Faint warm background for highlighted callouts.
Status green	#0F9D6E	Live / confidential badge dot.

DO NOT USE

- The old #0E0E11 "near-black" — replaced by INK #04242D .
- Separate #555 / #999 greys for text. Use opacity on INK instead.
- A blue. Stratos Edge is teal + coral, not teal + blue.
- More than one coral per visible area. Coral is precious — one mark per moment.

Typography.

Two fonts. Work Sans is the brand voice; Lora is the body and the editorial moment.

WORK SANS — THE BRAND VOICE

AI failures aren't technology failures.

Used for every headline, label, button, eyebrow, wordmark, and the coral period device. Weights 100–600 available. Brand voice lives at 400 for headlines, 200 for serene/large treatments.

LORA — BODY & EDITORIAL

Stratos Edge advises mid-market organizations in healthcare and financial services where getting AI right is a strategy problem before it is a technology problem.

Used for body paragraphs, long-read content, and FlightPlan deliverable hero titles where editorial weight matters. Weights 400–700 plus italic.

TYPE SCALE

ELEMENT	FONT	SIZE	WEIGHT	NOTES
Hero headline	Work Sans	40–72pt	400	Letter-spacing -0.015em to -0.02em. Coral period.
Section headline	Work Sans	32–56pt	400	-0.02em. Coral period.
Sub-heading	Work Sans	18–22pt	600	
Editorial hero	Lora	32–48pt	400	For Playbook / FlightPlan dark sections.
Body	Lora	16–18pt	400	Line-height 1.55. Color INK.
Eyebrow / label	Work Sans	9–13pt	500	UPPERCASE. Letter-spacing 0.12–0.22em. CORAL.
Wordmark small	Work Sans	9–10pt	500	UPPERCASE. Letter-spacing 0.25em.

Button label	Work Sans	14pt	400
--------------	-----------	------	-----

The pairing rule. Structure → Work Sans. Story → Lora. The website's one notable inversion: nav is Lora, not Work Sans — reads "publication," not "tech product."

The coral period.

The single most signature typographic move. Every brand headline ends with a coral period.

EXAMPLES

What we help you do.
FlightPlan™ is how we do it.
Your documents are on the way.
Ready to see the full picture?

Mechanics

The headline is set in INK / white / on-background color; only the terminal . switches to CORAL. The period inherits the headline's font weight and size — it just changes color.

```
What we help you do<span style="color: #FF6B4A">.</span>
```

Rules

- One per headline. Not per sentence in a paragraph.
- Always at the end. Never mid-headline.
- Question marks and exclamation marks follow the same rule — the terminal punctuation switches color.
- The period inherits the headline's font weight and size automatically — don't restyle it.
- Don't use on body paragraphs. The coral period is a *headline* device.

Marks.

Logo for full-context use; lettermark for tight contexts (favicons, app icons, profile photos).

Logo

Construction. Work Sans. **STRATOS** at weight 500, letter-spacing 0.18em. Vertical pipe separator. **EDGE** at weight 300, letter-spacing 0.14em, opacity 85%. Separator is 1px × 13px at 25% (on dark) or 15% (on light) opacity. Minimum clear space equals the cap height on all sides.

Lettermark

Layered horizontal bands — stratospheric layers — with an offset coral period. The coral-period device translated into the mark.

DON'T

- Distort proportions, recolor, or add drop-shadows.
- Replace fonts in the wordmark.
- Embed in colored circles or filled containers.
- Use the wordmark and the lettermark together in the same composition.

Signature devices.

Visual moves that recur across the site and FlightPlan deliverables. Use consistently — they make material instantly recognizable.

Accent bar

Short coral gradient bar used as a section divider and as the underline beneath document titles.

44pt wide · 3pt tall · 2pt radius · `linear-gradient(135deg, #FF6B4A 0%, #FF8A6B 100%)`

Eyebrow label

Small uppercase tracked-out coral label sitting above a headline.

BRAND GUIDELINES

Signature devices.

Status dot

A small filled circle, 6×6px, paired with a small Work Sans label. Used in document headers to show state.

● LIVE · CONFIDENTIAL ● ADMIN PREVIEW · DRAFT ● GENERIC MUTED

Backgrounds & rhythm.

A small set of section backgrounds, alternated for rhythm without introducing new colors.

WHITE · #FFFFFF

Default page background. Hero.

OFFWHITE · #F8F8F8

Alternating sections for rhythm. Stat blocks.

CREAM · #F2F0E9

Warm editorial moments. Long-read content.

DARK TEAL · #04242D

Hero bands, footers, FlightPlan section dividers, intentional drama. Always with white / coral text.

A document that rotates **WHITE → OFFWHITE → DARK_TEAL → WHITE** feels Stratos without any other styling work. Don't add a fifth background.

Hierarchy on dark teal

LAYER	COLOR
Primary text	#FFFFFF or #F5F5F7
Body / secondary	rgba(245, 245, 247, 0.65)
Muted	rgba(245, 245, 247, 0.45)
Accent	#FF6B4A (Coral)
Footer text	rgba(245, 245, 247, 0.25)

Hierarchy on dark is opacity-driven, same principle as light pages. Don't introduce new greys.

This is visual identity only.

For voice, tone, document profiles, and how to actually write and format Stratos materials — see the **Documentation Guide**.

Source of truth: the live homepage at stratosedge.ai and the FlightPlan deliverables. If anything in this guide conflicts with what the homepage actually does, the homepage wins.
